LAWN CARE

- Fescue and Warm Season Lawns: Apply Bug Blaster to control white grubs and other lawn bugs.
- Centipede Lawns: Apply a fertilizer high in Nitrogen.
- Prevent brown patch and other diseases and apply a systemic fungicide to warm season lawns, cool season lawns and ornamental beds monthly. Available in Concentrate, RTU and granular.
- Prevent weeds in your lawn and landscape with all-natural options like the non-selective weed control, Bonide's Burnout and Burnout II, with active ingredients Citric Acid and Clove Oil or pre-emergent, Bonide's Maize Weed Preventer RTU hose end, made from corn meal.
